Native Spanish, fluent English, basic French

Orizaba, Veracruz, Mexico (UTC-6)

SUMMARY

Biomedical Engineer transitioning into IT and cybersecurity operations. Hands-on SOC home lab: Wazuh alert triage and Splunk SPL log investigation, with documented incident reports; completing Fortinet NSE 1. Background in real-time troubleshooting during live neurosurgical procedures, root-cause analysis of electronic faults and turning recurring guest issues into clear written procedures in hospitality operations. Bilingual English/Spanish, calm under pressure.

CERTIFICATIONS & TRAINING

Oct/2026 — **Fortinet NSE 1 Network Security Associate (in progress)** — **Fortinet**
Cybersecurity fundamentals: threat landscape and security basics.

Oct/2026 — **Splunk Cloud and Wazuh SIEM home lab** — **github.com/liliaem/soc-home-lab**
Set up a Wazuh SIEM home lab and simulated an SSH brute-force attack with Hydra; triaged the Wazuh alerts, then investigated the same logs in Splunk Cloud using SPL. Published both triage reports on GitHub.

EXPERIENCE

Jul/2023 – Feb/2026 — **Property Operations Manager** — **Self-employed, Short-Term Rental**
- Managed my own short-term rental end-to-end: turnover scheduling between bookings, guest service, incident and safety response, renovations, and market-based pricing.
- Tracked and documented all finances in Excel: profits, cash flow, consumables, taxes, and ROI.

Jan/2020 – Apr/2022 — **Freelance Electronics Technician**
- Component-level fault diagnosis and repair: microscope-assisted SMD micro-soldering, EEPROM programming, and thermal-imaging fault detection.
- Installed firewalls, reformatted and reinstalled computers, and configured operating systems (Windows, Linux), software, and hardware.
- Communicated findings and repair status to customers from intake to delivery.

2019 — **Surgical Technology Specialist** — **NEUROQUIRURGICA INTEGRAL FFMM**
- Diagnosed and resolved equipment faults in real time during live neurosurgical procedures (ZEISS surgical microscopes, Medtronic StealthStation S7 navigation, Midas Rex cranial drills), communicating clearly with surgeons under pressure.
- Preventive maintenance and in-procedure troubleshooting.

2017 – Mar/2018 — **Research Project — IEEE EMBC Paper** — **UAM Iztapalapa - SERME clinic**
- Collected and analyzed EEG data with MATLAB/Octave and machine learning; wrote and presented the peer-reviewed paper at IEEE EMBC 2018 (DOI: 10.1109/EMBC.2018.8512612).

SKILLS & TOOLS

Cybersecurity (in training): Fortinet NSE 1 fundamentals; Wazuh SIEM (home lab): alert triage and incident documentation; Splunk Cloud: log investigation with SPL.

Scripting & Data: Python, JavaScript, Bash, HTML/CSS, Next.js, MATLAB/Octave; macOS (zsh, Homebrew), Linux (SSH), VS Code, browser DevTools, Git/GitHub, LaTeX, Claude Code.

Analysis: Root-cause analysis, pattern recognition, clear written documentation, English written and spoken communication.

Automation & Productivity: Zapier (task automation), daily AI-assisted workflows (Claude, ChatGPT, Gemini), Notion and Obsidian (documentation and tracking), Excel, Google Workspace.

Hardware & Diagnostics: SMD micro-soldering (microscope-assisted), EEPROM programming, thermal imaging, microcontrollers and FPGA boards, medical equipment maintenance; Windows/Linux installation and configuration, firewall setup.

EDUCATION

Sep/2013 – 2018 — **Bachelor's Degree in Biomedical Engineering** — **UAM - Universidad Autónoma Metropolitana**
Professional license (Cédula Profesional) available upon request.

Interests: Taking things apart to see how they work; web development (meetbible.faith); baking; reading.
